Dairy and cold cuts display

The new line of BRERA displays was created to preserve dairy and cold cuts at the ideal temperature and to expose them directly into the dining area.

Due to their elegant design and compact size, the displays are perfect for storage in any type of location. The controlled ventilation guarantees the preservation of taste and aroma.

The all-glass door with UV treatment and shiny black perimeter gives to BRERA displays a sophisticated look and ensures maximum visibility of the stored products.

The led-lights have been especially designed to enhance the product appearance and to reflect in the internal cover made of AISI 304 stainless steel.

The displays are equipped with high-performance refrigeration systems and with low noise compressors. The "touch" digital thermostat gives a constant view of temperature and ventilation.

It is possible to choose the internal fitting between stainless steel tubes, hanging rods and stainless steel perforated shelves.

INTERNAL EQUIPMENT EXCLUDED.
